

RUTUJA BORCHATE

Navi Mumbai, Maharashtra

☎ +91-8591489376 ✉ rutujaborchate07@gmail.com

PROFESSIONAL SUMMARY

- Proficient in frontend development using HTML, CSS, Bootstrap, JavaScript, jQuery, and React to build responsive and interactive user interfaces.
- Experienced in backend development using C#, ASP.NET MVC, and .NET Core for developing scalable web applications.
- Strong understanding of object-oriented programming concepts, MVC architecture, and clean coding practices.
- Skilled in implementing CRUD operations, form validations, authentication functionalities, and database connectivity.
- Ability to integrate frontend and backend technologies to develop efficient and user-friendly full-stack applications.

EDUCATION

Fr. C. Rodrigues Institute of Technology

B.E. in Computer Engineering CGPA: 7.99

2021 – 2025

Vashi, Navi Mumbai

COURSEWORK / SKILLS

- **Full Stack Development:** HTML, CSS, Bootstrap, JavaScript, jQuery, React, HTML5, CSS3, C#, ASP.NET MVC, .NET Core
- **Programming Concepts:** Object-Oriented Programming (OOP), MVC Architecture, CRUD Operations
- **Database Skills:** SQL, Database Connectivity
- **Tools & Platforms:** Microsoft Visual Studio Insiders, VS Code, Notepad++, Git/GitHub, Google Colaboratory, Canva
- **Soft Skills:** Effective Communication, Teamwork & Collaboration, Problem-Solving, Adaptability, Time Management, Critical Thinking

PROFESSIONAL EXPERIENCE & INTERNSHIPS

- **Full Stack Development – CNC Web World, Navi Mumbai** **Dec 2025 – May 2026**
 - Contributed to the development of web applications using C#, ASP.NET MVC, and .NET Core technologies.
 - Developed responsive frontend interfaces using HTML, CSS, Bootstrap, JavaScript, and jQuery.
 - Integrated frontend and backend modules to ensure smooth application functionality and user experience.
 - Worked on database operations, data handling, and implementation of CRUD functionalities.
 - Utilized Git and GitHub for version control, code management, and collaborative development workflows.

PROJECTS

Cloud Kitchen Web Application | HTML, CSS, Bootstrap, JavaScript, React

April 2026

- Developed a responsive Cloud Kitchen website using HTML5, CSS3, Bootstrap, JavaScript, and React.
- Implemented user features like Sign Up, Login, Cart, and food category browsing for better UX.
- Designed a structured navigation bar with Home, Menu, Offers, and About Us sections.
- Organized food items into structured categories to improve browsing efficiency and faster menu selection for users.
- Integrated external ordering links to Swiggy and Zomato for seamless user redirection.

Healthy Lifestyle Web Application | HTML, CSS, Bootstrap, JavaScript, React April 2026

- Built a responsive Healthy Lifestyle web platform using HTML5, CSS3, Bootstrap, JavaScript, and React.
- Created navigation for Home, Weight Loss, Weight Gain, Workout, Yoga, and Contact sections.
- Implemented a search feature for quick redirection to relevant pages.
- Focused on Bootstrap-based responsive design for smooth experience across all devices.

IdentityVault: User Management System | ASP.NET MVC, .NET Core, C#, Bootstrap May 2026

- Developed a secure user management system using ASP.NET MVC and .NET Core with a responsive UI.
- Implemented user registration and login functionality with profile creation and image upload.
- Designed a user dashboard to display personal details such as name, DOB, and city after login.
- Built an admin-style interface to manage users with view, edit, and delete operations.
- Applicable in real-world systems like employee management, student portals, and admin dashboards.

Voice to Sign Language Converter using Python | Python, Google Speech-to-Text API 2022–2023

- Developed a system to convert voice input into text using the **Google Speech-to-Text API**.
- Applied NLP techniques to identify root words and map them to corresponding sign language images.

Spam Wars: Machine Learning Tactics for Email Defense | Python, Machine Learning 2023–2024

- Built a machine learning model to classify emails as **spam** or **ham**.
- Used TF-IDF, SMOTE, and models like Naive Bayes and Decision Trees for email classification and evaluation.

BotGuard: Safeguarding Twitter from Bots | Python, Machine Learning 2024–2025

- Developed a Twitter bot detection system using temporal and behavioral analysis techniques.
- Trained machine learning models such as Random Forest, Gradient Boosting, and AdaBoost for bot classification.

PUBLICATIONS

- **Safeguarding Twitter from Bots using Temporal Analysis**
Accepted at the **International Conference on Emerging Trends in Industry 4.0 Technologies (ICETI4T 2025)**
Published in IEEE Xplore, Nerul, Navi Mumbai, India
Author: **Rutuja Borchate**, as part of a 4-member research team
- **Behind the Tweets: Behavioral Bot Detection on Twitter**
Accepted at the **16th International Conference on Computing, Communication and Networking Technologies (ICCCNT 2025)**
To be published in IEEE Xplore, Coimbatore, Tamil Nadu, India
Author: **Rutuja Borchate**, as part of a 4-member research team

COURSES AND CERTIFICATIONS

- Machine Learning - Acmegrade
- Google Solution Challenge
- Artificial Intelligence Tools - Be10X
- Latex - FCRIT, Vashi

ACHIEVEMENTS

- Published IEEE paper on **Safeguarding Twitter from Bots using Temporal Analysis**.
- Paper **Behind the Tweets: Behavioral Bot Detection on Twitter** accepted at ICCCNT 2025.
- Completed Full Stack Development training with hands-on experience in frontend and backend technologies.
- Gained exposure to web development, database handling, and version control tools.
